

PE 4 Solar Energy Installation

Feasibility Study

The Solarize Saugerties Team, in consultation with the Superintendent of Parks and Recreation and the Town Board Liaison, established criteria for the selection of an existing town-owned building as a site for the donation of rooftop solar panels by Direct Energy Solar (DES).

The criteria established were:

1. The extent to which the building was used by the public.
2. The visibility of the building in the community.
3. The condition of the roof.
4. Sun exposure on the roof.

After an evaluation of all town buildings based on the established criteria, the Frank D .Greco Senior Center was chosen because it most clearly meet the criteria.

The rooftop solar panels were donated by Direct Energy Solar (DES) as a result of an agreement by DES as part of the Solarize Saugerties Campaign. DES is a NYSERDA certified installer <https://www.nyserda.ny.gov/All-Programs/Programs/NY-Sun/Solar-for-Your-Business/How-to-Go-Solar/Find-a-contractor/Commercial-Installer> vetted by Solarize Hudson Valley and chosen as one of the installers for the Solarize Saugerties Campaign.
