Subject: RE: Action 7.17

Hi Zoe,

Good catch – you are correct; this means the town gets 4 points (instead of 3) for action 7.17; 2 points for the wetland protection ordinance and 2 points for the incorporation of conservation of wetlands into site plan review. Action 7.17 has a complex set of tiered points and it was difficult to tell from the submittal form which tiered points were being requested. Thank you for reviewing the notes in the workbook so closely. I appreciate your feedback and your eye for detail.

So now the total points earned for Mamaroneck are 133 – and you have facilitated submitting the documentation for each and every one of those points. I wish we had more interns like you across all of New York State! And, now that you know how it works, I hope other municipalities engage you to support their path to CSC certification 😊

If you have any other feedback about the program and your experience with the process; please feel free to share it – all of it: good and bad. It is a new and evolving program and your participation will help shape it. You are one of a small number of people who have extensive knowledge of the program, so any thoughts you'd like to share with me are welcome. If you are willing to have a quick phone call to debrief about your experience, let me know; that'd be useful for me in improving the program.

If we don't talk again, stay in touch – I'm on LinkedIn if you want to connect there. I wish you the best!

Subject: Action 7.17

Hi Dazzle,

I was looking over Action 7.17 and I noticed that incorporating conservation of wetlands into Site Plan review and other regulations was 2 points, but we only received 1. Did the point distribution change?

Thanks for all your help over the past few months. It has been greatly appreciated!

Sincerely,
Zoe Kaldor
