

## WHAT IS XERISCAPE ?

The Xeriscape Garden is an interactive teaching tool in the selection of heat tolerant, water-wise plants, integrated pest management and alternative landscaping techniques. Master Gardeners will explain the principles and eco-benefits of this drought resistant garden design and planting techniques which help to create this incredible gardening spectacle.

Xeriscape was developed in Denver CO, at a time when there were severe water shortages, and it is now one of the most accepted landscape practices in the western part of the US. In fact, some SW cities require that all new landscaping be xeriscape! The term xeriscape is derived from the Greek word Xeros which means dry. It refers to a landscape that uses little supplemental water.

If you would like to schedule a free guided tour for your group or organization, leave a message on the Master Garden Hotline at: 845-340-3478.

## MASTER GARDENER PROGRAM

Master Gardeners are volunteers trained in the art & science of gardening who provide the public with gardening programs & activities that draw on the horticulture research and expertise of Cornell University.
