Gary Gardner – General Foreman – Department of Public Works - Village Of Dobbs Ferry

Recycling Preparations for Village Sponsored Events

Prior to any village sponsored events, extra recycling receptacles are placed throughout the area of the event. These receptacles are in addition to those that are permanently in place. Following the conclusion of the event, the receptacles are emptied into a separate truck as not to be mixed in with garbage. Then that truck will be brought over to our village garage and emptied into a separate two yard container that the village has for recyclables. In addition to the current supply of recycling receptacles, the village has purchased ten additional receptacles to be used to further promote recycling in the village.
