BEYOND CURB APPEAL

Why Living Landscapes Matter for Homeowners

It's no surprise that beautiful landscaping improves curb appeal and increases home value (by as much as 17%). But there are other benefits of living landscapes that smart buyers and sellers should know to protect their real estate investment and the environment.

HOW DO LAWNS BENEFIT HOMEOWNERS?

Improve Quality of Life

Without grass, your outdoor living areas, balconies, fire pits and other outdoor living areas will be hotter and less enjoyable. Plus, grass helps reduce stress and makes life sweeter!

O₂ Produce Oxygen

Just 50 square feet of turfgrass produces enough oxygen to meet the daily needs of a family of four!

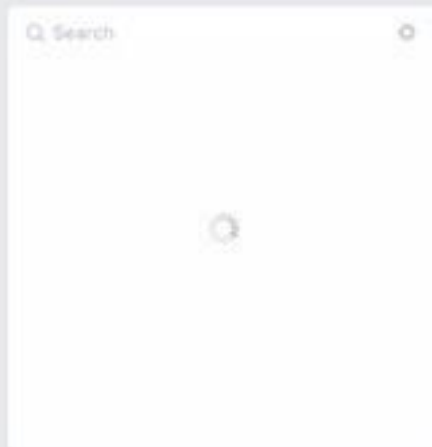

CO₂ Combat Carbon

Turfgrass is the biggest carbon sink in the country and absorbs 20 times more carbon than it takes to maintain itself.

Reduce Energy Costs

Planting the right living landscape makes your home warmer in the winter and cooler in the summer.

YOU CAN STILL HAVE A YARD — YOU JUST HAVE TO CHOOSE WISELY

➔ CLIMATE CHANGE

Transportation represents the largest source of New York State's greenhouse gas emissions and also the largest part of most New Yorker's personal carbon footprint as well. This is why it is critically important that we all lower our emissions from transportation so that we can meet our greenhouse gas emission reduction goals (a 40% reduction by 2030 and 80% by 2050). Plus, you may discover that a more sustainable commute is both relaxing and enjoyable! Learn more about the [impacts of climate change in New York](#).

What causes climate change?

Most of New York's emissions come from transportation, electricity, and heating.

Brushing your teeth for three minutes and running water all the while-- uses 4 gallons a minute or 12 gallons of water ! Are you willing to be a Climate Smart Dover leader and conserve water!

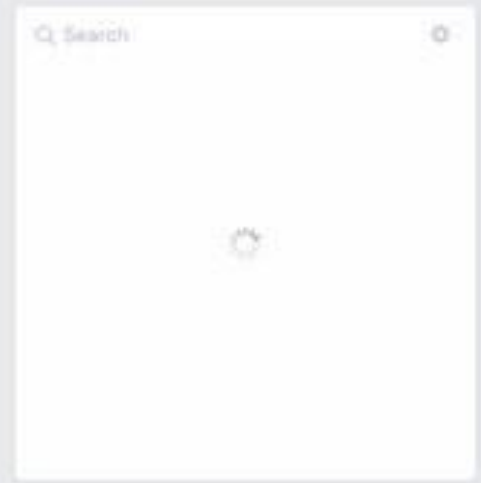

USA SNAPSHOTS®

42%
of Americans admit they do not conserve water but are willing to do so if they were better informed.

Turn off the water while you brush your teeth and save 4 gallons a minute. That's 200 gallons a week for a family of four.

SAVE WATER
