

## FACEBOOK CLIMATE SMART SAUGERTIES

The information below was posted on November 27, 2019 and is one of the recent information posted to Fb. "The map below shows the main area of Saugerties projected to be below annual flood level by 2050.

NOAA projects a 67% risk of at least one flood over 6 ft taking place between now and 2050 in the Saugerties area, due to climate change."
