Energy and Climate Action

The Suffolk County Energy and Climate Action Office identifies opportunities for improved energy practices for the County and coordinates with the Department of Public Works to execute and implement those practices. Suffolk County has an Energy Initiatives Working Group composed of six stakeholders from various departments that utilize all tools and programs available to further the goal of developing renewable energy and making County buildings and fleet more energy efficient.

The overarching goal is to reduce energy use and energy costs to the County while achieving lower carbon emissions from County operations. It is these smart government investments that lead to a cleaner environment and increase overall quality of life for County residents, support of the growing green energy sector of the local economy, all while reducing energy costs to the taxpayers.

Resources and Programs

Commercial PACE Program
(Property Assessed Clean Energy Program)

Suffolk County's local businesses and not-for-profits can participate in Commercial PACE program.

Undertaking a clean energy project can reduce a building's energy bill, improve its operations, reduce its carbon footprint, and increase property value. EIC NY (PACE) Finance offers low cost, long-term capital for energy-related building improvements that is secured through a benefit assessment lien on the improved property.

Greenhouse Gas Emissions

Community Inventory

This Executive Summary offers a quick and interesting format to provide a snapshot of the sources of emissions from community activities.

Government Operations

Read the report. It tracks key aspects of the County's emissions.

Climate Action Plan

Detailing the County Commitment

This Climate Action Plan (CAP) is the result of a two-year process. It was prepared in accordance with the commitment made by the Suffolk County Legislature when it adopted the Climate Smart Communities pledge on November 20, 2012 through Resolution No. 960-2012.

*Adopting Climate Smart Community Goals in the County of Suffolk.

Energy Management and Sustainability

Benchmarking

Read the current year's report. Suffolk County is leading by example and has a robust, ongoing energy efficiency program. This NYSERDA report shows building energy use metrics.

Cleaner, Greener Long Island Regional Sustainability Plan

An ambitious undertaking by the Cleaner, Greener Consortium of Long Island to articulate a community-based vision for a more sustainable future.
