

Community Choice Aggregation

The Village of Irvington, as part of the Sustainable Westchester consortium, implemented the Community Choice Aggregation program (aka, Westchester Power) in 2016. The necessary local laws were adopted during 2015 and the Village has been participating ever since.

We have requested the required “High Impact” documentation from NYSERDA, but have not received that information to-date. In place of this documentation, we have attached the latest update document from the Public Service Commission showing Irvington’s participation in the program. Also, a copy of the Village’s local law adopted in 2015 is attached.
