

Erie County Fleet Inventory Update Procedures

The Erie County Department of Public Works Fleet Manager will monitor and update the Fleet Inventory periodically throughout the year as vehicles are procured and/or removed. Efficiency goals of the fleet will be communicated to departments and options will be given for procurement of more fuel-efficient and alternative fuel vehicles.

The Erie County Green Team - Transportation Committee meets quarterly and will assess the fleet inventory for opportunities to:

- Meet efficiency standards
- Switch to green vehicles
- Identify departmental opportunities to right-size and replace older vehicles, if applicable.

The committee contains representatives from the Departments of Public Works, Environment & Planning, Parks, as well as the Division of Sewerage Management and the Sheriff's Office.

The Department of Environment and Planning and Department of Public Works will update vehicle mileage annually through Gasboy records.

Erie County Fleet Inventory
