Our streetlights in Garrattsville were converted to LED on about May 19, 2020. In June, July, and August, we reduced consumption by 798 KWH and saved \$260 in energy costs. The installation costs were \$732, which will take us about six more months to fully recover. After that, all savings will be passed onto our Garrattsville residents in their 2021 tax bill. It's not a lot of W or \$ but every little bit helps.

Hey, folks, if you're seeing our posts, that means you care about climate change, you are environmentally aware, and you do things like reduce, reuse & recycle, compost, use energy efficient appliances, etc. So, why not join us in helping to reduce New Lisbon's GHG emissions, too? Like the things you're already doing, little old New Lisbon is not going to save the planet by itself but if all of us small towns do our little bits, the collective impact can be huge. If you'd l...
