Please note: There will be two locations for pick up: one in south Buffalo, one in Wheatfield, as well as several dates. Preference for pick up location and date will be selected by the purchaser at the time of order. Confirmation receipt will include the option selected for pick up.

There are several environmental benefits associated with rain barrels. Foremost, rain barrels reduce stormwater runoff. This is water that does not soak in to the ground and can transport many pollutants to our local waterways. By using collected rainwater for watering lawns, gardens, potted plants and for washing off patio furniture and tools, rain barrels conserve water. From a gardening perspective, the natural nutrients in rain water make it far better than tap water, which has chlorine and fluoride in it. With a rain barrel, gardeners can minimize or eliminate their use of chemical fertilizers. Composting yard trimmings and food scraps is a simple way to recycle nutrients and return them to the soil. The addition of compost enriches soil and will stimulate plant growth, thereby reducing the need for chemical fertilizers. Composting has the added benefit of reducing the amount of solid waste that would otherwise go to a landfill. **Please contact Erie County DEP at 716-858-2521 if you have any questions.**

System Rain Barrel

55 Gallon Capacity

As part of the Norseman Environmental brand of products, the SYSTEMN Rain Barrel can lower municipal water demands and save energy at water treatment facilities by reducing water pollution and storm water runoff. Rain water, free from chlorine and water treatment chemicals, is an excellent water source for lawns, plants and gardens.

Earth Machine Compost Bin

80 Gallon Bin

The Earth Machine® is a durable backyard compost bin designed to compost food and yard waste, effectively diverting it from landfills. When residents are encouraged to divert organics from the waste stream and are educated about the benefits of composting, up to 50% of organic waste can be diverted from the waste stream.

Norseman works closely with communities and municipalities to implement a successful composting program. From one-day, turn-key sales events to public education programs, Norseman experts help residents learn to divert food and yard waste from landfills. Through this diversion, communities are able to reduce curbside collections and decrease tipping fees.

FEATURES

- Large capacity (80 gallon or 10 cubic feet)
- Easy snap-together assembly. Assembles in minutes.
- Durable and lightweight design
- Convenient 13" x 16.5" / 33 cm x 41.9 cm harvest door
- Twist locking lid included
- Vertical and horizontal columnar ventilation
- Manufactured with recycled material
- One-day sales events available
- Public education/workshops available

PRODUCT DETAILS

Product ID:	NPL 300
Dimensions:	33.0" / 83.8 cm (diameter)
