

RESOLUTION NO. 22-239

ESTABLISHING A CONSISTENT RECYCLING STRATEGY ACROSS COUNTY BUILDINGS

WHEREAS, Madison County strives to minimize operational environmental impacts wherever possible, particularly in relation to reducing our carbon emissions; and

WHEREAS, the need for conveniently accessible and clearly labeled recycling receptacles in all common areas and employee workstations divert recyclable waste from trash bins and reduces landfill emissions and repurposes material; and

WHEREAS, the County's Climate Smart Task Force recommends this action to strengthen the County's status as a Climate Smart Community; and

NOW, THEREFORE, BE IT RESOLVED that the Madison County will ensure recycling bins wherever there is a trash bin, in all common areas and employee workstations.
