

PE5 Action – Recycling Bins in Government Buildings Memo
February 2022 Village of Bronxville

Recycling Bins

Since 2018, the Village of Bronxville has provided recycling bins throughout all village buildings including Village Hall, Police Department, and Public Works. The Village recognizes the importance of recycling and believes it is a critical in reducing energy use and limiting specific materials from the waste stream.

Upon enrollment in the Climate Smart Communities program, the Village has taken steps to supplement their existing recycling bins with additional ones throughout the municipal buildings and providing helpful signage in certain places to inform the staff. Bins are located at workstations, common areas, and our kitchen/breakroom.

Below are photos of bins throughout our village buildings.
