Bedford 2030 CLIMATE ACTION PLAN

Attendee Sheet

Bedford2030, event organizer, estimates that they had about 10 repairs at the event.

Local Community Repair team dedicated to continuing it's commitment of the program Long-term

Bedford2030 has run three repair cafes in the past two years (September 26th, 2020, August 7th, 2021 and May 14th 2022) and continues to plan and advertise them for more people to join. Specialized experts volunteer to help out with the repairs each time and are responsible for the success of the events.

For this specific repair cafe, the team of seamstresses were from the Community Center's Community Studio training program and often upcycle donated garments and their creations are sold at the Community Shop. The links can be found here:

<https://communitycenternw.org/community-studio> and <https://communitycenternw.org/community-shop>. The seamstresses were able to find materials from our Take It or Leave It Shed to create new garments- the placements in the photo became a sun hat. We also had two volunteers from the recurring Yorktown Repair Cafe. The link is here: A hand-sewer specialized in "visible repair"- highlighting what otherwise would be considered a flaw.

Local government engagement

See the attached local government's newsletter that publishes the details, date, time, and of Bedford2030's repair cafe on May 14th, 2022.

August 7th 2021 Repair Cafe

Date: Saturday August 7th, 2021

Time: 10am - 12pm

Location: Bedford Hills Train Station

Flyers and Photographs

Description of Implementation

We are seeking 4 points for the Community Repair action. In the attached summary document, there is information for two repair cafe's held in Bedford one on May 14th, 2022 and one on August 7th, 2021. Included for each repair cafe is the location, date, time, local government role, flyers for each event, photographs and sign-in sheets. These events were both held in the last five years.
