Sustainability Collaborative

Overview

The Sustainability Collaborative works to preserve and enhance the long term viability of the Town from both environmental and fiscal perspectives. The Collaborative serves as an advisor to the Town Board and to such other authorities, boards, departments, committees, commissions and employees of the Town as the Town Board may authorize from time to time.

The Town of Mamaroneck is committed to sustainability - living within our means to protect the Town for the future and to lower current costs. Throughout the past few years the Town has pursued projects that aim to improve the quality of life within the Town, create a more resilient community, and to become a more sustainable community. Sustainability is an important goal for our community in order to protect the natural environment, reduce flooding, reduce energy use and save money,

- Michele Lewis, Member
- Steve Moser, Member
- Arlene Novich, Member
- Elisabeth Radow, Member
- George Roniger, Member
- [Robin Nichinsky](#), Councilperson and Town Board Liaison

Goals

The goals of the Sustainability Collaborative are to make recommendations for:

- Maintaining and improving the quality of life in the Town
- Developing programs and protocols designed to prepare, mitigate and/or respond to, and from the aftermath of natural or other disasters
- Preserving the Town's natural resources
- Wherever possible and cost efficient, continuing to deliver the same types and levels of services to the community (or adding to or improving such services or the delivery thereof) in ways that reduce pollution, conserve, or reduce the consumption of energy or make the use of town resources more efficient
- Improving the Town's resiliency in combating shortage of supplies and power if such shortages arise
